EDUCATIONAL NEED AND PROGRAM GOAL:
South Texas is leading the country in new and ongoing cases of diabetes as evidenced through emergency room and hospital admissions and the clinic environment. It is crucial to continue looking for ways to prevent, manage and treat diabetes and all its complications. All health care professionals should stay up to date on the latest advancements in this field in order to provide patients with better care and education.

This two-day seminar will feature outstanding speakers covering a broad range of topics, including the latest drug therapies and disease management, updates in nutrition, the latest research in regards to the gut microbiome and the associated comorbidities of diabetes. Attendees will be able to use this information in the medical management and prevention of complications for the patient with diabetes.

NURSING PURPOSE STATEMENT:
The purpose of this education activity is to enhance the knowledge and management of diabetes by the Registered Nurse in the area of psychiatric, acute and outpatient care environments, by addressing the following topics specific to the diabetic patient: interprofessional education; weight management and goal setting; management of the mentally compromised patient; gestational diabetes; hypertension and cardiovascular disease; the use of combination therapies with complex type 2 diabetes; clinical updates in endocrinology, gastroenterology; insulin therapies in outpatient setting and evaluating diagnostic error; human expertise and cognitive biases used by health care professionals in an effort to provide the most up to date information when caring for patients and improve patient outcomes as evidenced by improved compliance to therapeutic recommendations through education.

TARGET AUDIENCE:
This activity is designated for family practice, primary care, internal medicine and interested sub-specialty physicians, as well as pharmacists, pharmacy technicians, physician assistants, registered nurses, nurse practitioners, dietitians, community health workers and other interested health care professionals.

EDUCATIONAL METHODS:
The format will consist of PowerPoint assisted lectures with integrated audience response questions, each followed by a brief question and answer session.

GRANTOR:
There is no commercial support for this activity at the time of printing.
